

The following table attempts to show the manifestations linked to each of the neuro-divergent conditions. No one is likely to have a problem with everything associated with his or her particular condition(s). Someone who is not significantly, say Asperger's, could still have one or two of the manifestations associated with that condition. The √ sign indicates a definitive problem area, whereas the \* sign indicates a possible problem area.

	Dysprax	Dyslex,	Dyscal.	Adhd	Asper	Tour.
<b>Problem Areas:</b>						
<b>Perception</b>						
Reading and spelling and written expression	*	√	*	*		
Numbers and arithmetic	√	*	√			
Interpreting visual images	*	√	*	*		
Interpreting language literally/trouble with metaphor	*	√	*		√	
Sensitivity to light, touch, taste, pain, sound	√	*			√	
Judging time, distance, space and speed	√	*	*	*		
<b>Communication</b>						
Constructing communication in your head	√	*	*			
Planning and writing essays	√	√	*	*	*	
Being succinct	√	√	*	√	√
